

ELECTRICAL INSTALLATION & SERVICE KIT

Reduces damage to wires and insulation.

Essential workshop kit for the service, repair and assembly of electrical/electronic assemblies.

“All Tools Made From Strong Engineering Plastic”

Protects during cutting.

Includes the unique Bojo Wire Guide tool (ATH-30-UNGL) designed to assist re-wiring into existing harnesses and safe cutting of cable ties.

Wire Guide Tool
(ATH-30-UNGL)

Wire Stuffing Tool
(ATH-35-UNGL)

Reduce the risk of marring and damage to plastic, composite or decorative trim panels.

Wire Pulling Tool
(ATH-36-UNGL)

Enable safer prying and opening of control panels, inspection covers and plastic case assemblies.

Tab Opener Tool
(ATH-26-UNGL)

Keeping fingers and metal tools away from component edges reduces risk of operator injury and electrical shorting. Also assists component placement during soldering operations (not designed to withstand direct contact with soldering tools)

NOT WARRANTED FOR HIGH VOLTAGE USE

Wire Soldering Tool and Case Opener
(AT-1-4-UNGL)

Bojo Tool Roll Option
(TR-5-R)
