

AUTO BODY PANEL ADJUSTMENT & SERVICE KIT

Reduced damage to surfaces and coatings.

Product Description

Comprising of a Laser Cut Gap Gauge,
10" Straight and Angled Pry Bars.

**"All Tools Made From
Engineering Plastic"**

**These large levers give minimal damage
when prying doors, quarter panels or trunk
lids. The gap gauge makes it easy to confirm
a consistent gap.**

This comprehensive Body Panel Adjustment Kit comprises our two large pry levers, five of our most versatile pry and clip removal tools and our unique laser-cut panel gap gauge to help completion of panel installations and repairs to factory-fresh standards of fit and finish. Super slim ATH 20 and ATH 21 pry tools are supplied in our strongest material allowing concentrated prying action where space is limited between panels. Essential for body-shop and restoration workshops, but in particular offers an unmatched range of solutions for repairs and assembly in alloy and composite materials.
